

Picky Finder

A digital map that allows picky eaters to filter food options and find a food that fits their criteria within a selected radius from any mobile device. The application takes into consideration design practices for the autistic population, which are a subgroup of existing picky eaters.

Find the food that suits you.

Find the food you like.

Picky Finder's algorithm allows picky eaters to filter food options nearby through a mobile application, as they walk around, they can discover new options that fit them, wherever they go. They can also create multiple profiles and save their preferences for a quick and easier experience.

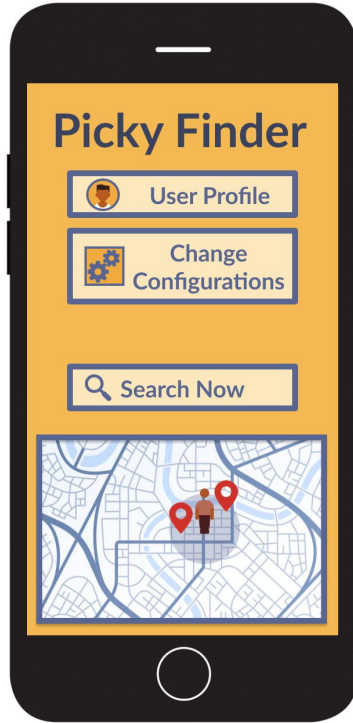

Test type

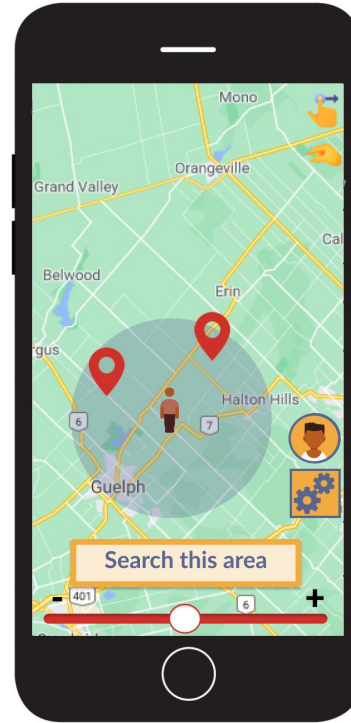

ABCDEFGHIJKLMNOPQRSTUVWXYZ

abcdefghijklmnopqrstuvwxyz

	Button with text label	Image icons	Other elements
